

Omni Cable Statement on Conflict Minerals February 2014

Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Section 1502) requires SEC reporting companies to make specialized disclosures and conduct related diligence concerning specified minerals and their derivative metals contained in the companies' products, whether manufactured directly by such companies or by contract manufacturers. The minerals and metals covered by the rule, which are included in many common products, include: cassiterite, columbite-tantalite (coltan), wolframite, tin, tantalum and tungsten, gold, and other minerals or derivatives designated by the U.S. Secretary of State in the future (collectively, without regard to origin, "Conflict Minerals").

The sale of Conflict Minerals sourced, mined or smelted in the Democratic Republic of the Congo (DRC) and its adjoining countries is believed to be financing conflict in the DRC. The intent of Section 1502 is to reduce sources of funding for armed groups that are committing human rights abuses and contributing to the conflict in the DRC.

Omni Cable does not (1) manufacture or contract for the manufacture of any products which contain Conflict Minerals or require the use of Conflict Minerals for their production, or (2) purchase minerals or metals directly from smelters or mines. However, Omni Cable does procure and resell products that contain Conflict Minerals related to such products' functional performance or that otherwise require the use of Conflict Minerals for their production. In this regard, Omni Cable must rely on information provided by its suppliers concerning the source of such Conflict Minerals. Omni Cable has sought and obtained assurance from its primary suppliers that such products do not contain or use in production Conflict Minerals that are sourced from the DRC or adjoining countries.

If you require specific Conflict Mineral sourcing information for Omni Cable products or require more information on our Conflict Mineral policies, please contact your local Omni Cable sales representative or supplychain@omnicable.com.
